## Summary:

- Building - tall narrow building. Some association between top of building and some point in side building (feel they are connected in some way). Inside building is hallway with numerous rooms of varying sizes, large room in middle. Room on corner of interest. Contains desk with side walls. Area has international feeling; work place feeling. This area has a familiar feel (reminiscent of ASA and H.S. lab environments). Area is closed, secluded and quiet. Large room has many as yet unidentified objects inside. People - serious, boredom, curious, strange, confusing, uneasy concerned. mix of male/female.

Area feels like research area (human research?), like monitoring area.
